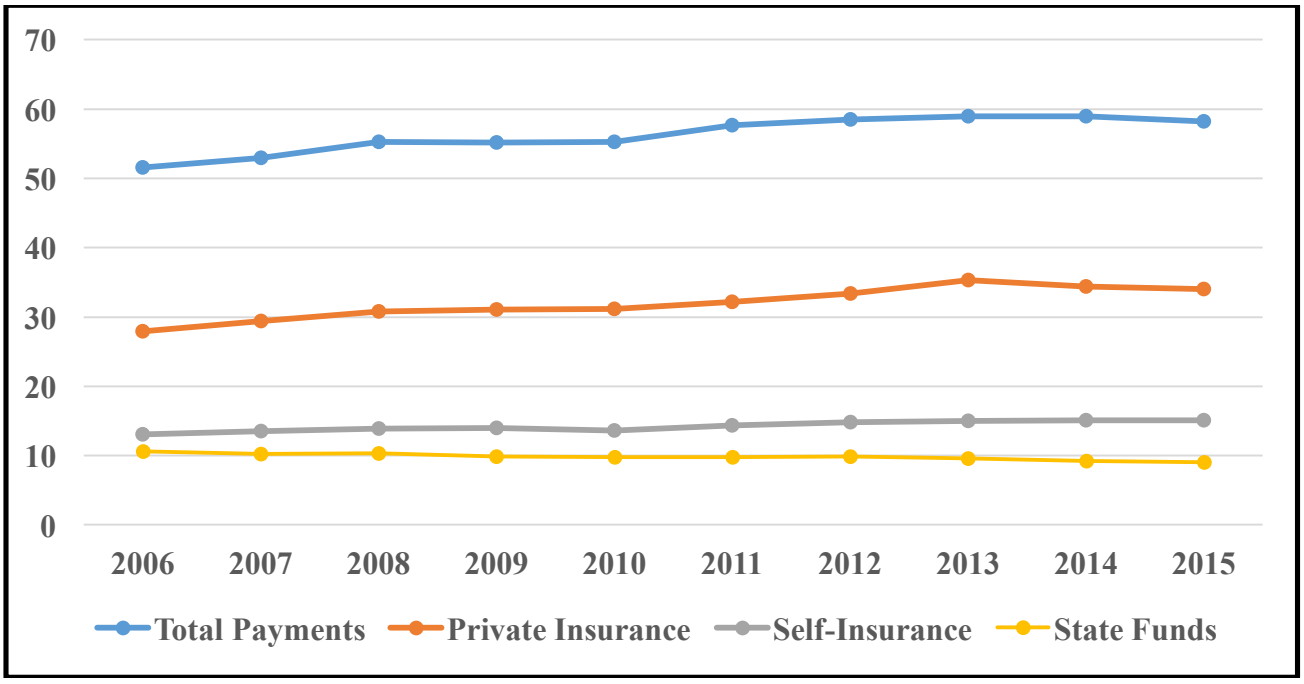
FISCAL DATA FOR STATE WORKERS' COMPENSATION SYSTEMS 2006 - 2015

I. Summary of Results

This Bulletin reports on state workers' compensation benefit payments and trends from 2006 to 2015. The Bulletin provides new data for 2015, and certain revised data for 2011 – 2014. *Please note that the numbered tables referred to in the text are attached at the end. For online readers, each numbered table is contained in a separate file on this portion of the "Members Only" section of the UWC website.* Readers should also know that the National Academy of Social Insurance (NASI), which provides source data for the Bulletin, is no longer providing revised data on a state by state basis for private insurers, self-insurers, or state funds. This data is therefore not available for the revised years 2011 – 2014. Revised data for these years is available for covered workers, covered payroll, total benefits, medical benefits, and cash benefits. The results of the Bulletin are summarized as follows:

- Total benefit payments (indemnity and medical) decreased by $820.0 million (-1.4%) from 2014 to 2015, but increased by $6.5 billion from 2006 to 2015 (12.6%). These changes are illustrated in the following chart, which also details the changes during the same time periods for private insurance, self-insurance and state funds.

BENEFIT PAYMENTS
(in billions)



- Total indemnity benefits decreased by $91.0 million (-0.3%) from 2014 to 2015, but increased by $2.0 billion (7.5%) from 2006 to 2015.
- Total medical benefits decreased by 729.0 million (-2.4%) from 2014 to 2015, but increased by $4.6 billion (18.0%) from 2006 to 2015.
- State specific benefit costs have declined during the past ten years. The average benefit cost rate (cost per $100 of covered payroll) decreased from 0.89 to 0.83 (-6.7%) from 2014 to 2015, and from 0.96 to

0.83 (-13.5%) from 2006 to 2015. The benefit cost rate of most states and the District of Columbia decreased from 2014 to 2015. The states with the largest decreases were Delaware (-12.4%), Florida (-11.0%), Illinois (-16.7%), Maine (-11.7%), and Oregon (-10.7%). The only two states with increases were Hawaii (4.8%), and South Dakota (3.1%). Colorado, Kentucky, and Missouri were unchanged. Ranked by benefit cost rate, nine states increased or decreased their rank by at least ten places from 2006 to 2015. (Please note that a ranking of 1 indicates the lowest cost rate, so an "increase" means moving to a lower number.) The states with the largest increases were Colorado (25 to 13), North Carolina (25 to 15), Ohio (39 to 25), and South Dakota (30 to 14). The largest decreases occurred in Connecticut (11 to 27), Maryland (9 to 20), New Jersey (17 to 34), New York (10 to 36), and North Dakota (13 to 27).

- It is also useful to examine national trends outside of California, which contributed 14.1% of national payroll and 20.7% of total benefits in 2015. Total benefits in California decreased by 0.3% from 2014 to 2015, but increased by 20.4% from 2006 to 2015. The largest increase was 7.4% from 2010 to 2011. The largest decrease was 1.3% from 2007 to 2008.

  Total benefits decreased in most states from 2014 to 2015, with the largest decreases occurring in Delaware (-8.5%), Illinois (-11.7%), Maine (-7.8%), North Dakota (-6.2%), and Ohio (-5.4%). The largest increases occurred in Colorado (5.9%), Hawaii (10.2%), Kentucky (5.4%), South Dakota (9.2%), and Utah (7.7%). There was a slight 1.4% national decrease from 2014 to 2015, but there was a 12.6% national increase from 2006 to 2015.

  California medical benefits decreased by 3.1% from 2014 to 2015. Medical benefits in most states decreased from 2014 to 2015, with the largest decreases occurring in Illinois (-11.3%), Indiana (-7.9%), North Dakota (-10.8%), Rhode Island (-15.3%), and Wyoming (-8.5%). The largest increases occurred in the District of Columbia (7.8%), Hawaii (9.9%), Idaho (5.3%), Kentucky (5.2%), and Michigan (5.8%).

  The benefit cost rate decreased by 7.6% in California from 2014 to 2015. The table below summarizes national trends for 2014 and 2015 outside of California.

Total Non-Federal Workers' Compensation Benefits, Coverage, and Costs (excluding California)

Aggregate Amounts	2015	2014	Percent Change
Covered workers (in thousands)	116,785	114,359	2.1
Covered wages (in millions)	5,986,996	5,699,482	5.0
Benefits paid (in thousands)	46,085,115	46,873,410	-1.7
Medical benefits	23,130,571	23,646,176	-2.2
Indemnity benefits	22,954,544	23,227,235	-1.2
Benefit Cost Rate	0.83	0.89	-6.7

II. Scope of Bulletin

This bulletin provides data for: (1) total benefit payments (indemnity and medical); (2) private insurance benefit payments; (3) self-insurance benefit payments; (4) state fund benefit payments; (5) percentage distribution by payer; (6) medical benefit payments; (7) benefits per covered worker (average benefit cost per covered employee); and (8) the benefit cost rate (benefits per $100 of covered payroll). In addition to growth in covered employment and wages, other factors affecting benefit payments include changes in benefit levels, legal and medical standards for establishing work causation, and measuring permanent disability, medical costs, administrative practices, the percentage of the labor force employed in dangerous occupations, and statutory coverage. These data are for the states and the District of Columbia, and include benefit payments made under the Longshore and Harbor Workers' Compensation Act, but not benefit payments made to federal employees and their dependents under the Federal Employees' Compensation Act, the Black Lung Benefits Act, the Energy Employees Occupational Illness Compensation Program Act, the Radiation Exposure Compensation Act, the veterans compensation program, and programs providing benefits to railroad workers involved in interstate commerce and merchant seamen.

Methodology for Determining Covered Workers and Payroll

The Social Security Administration (SSA) originally estimated the number of workers in each state covered by workers' compensation laws, as well as the amount of benefits paid. But SSA discontinued this work in 1995, after publishing data for 1992-1993. NASI subsequently began compiling this data in 1997, and used the number of workers covered by state unemployment insurance (UI) programs to determine the number of workers potentially covered by state workers' compensation laws. The number of workers covered by state UI programs is collected in all states, based on the quarterly tax reports that employers submit to state UI agencies. For 1993-1996, NASI estimated that the number of workers covered by state workers' compensation laws was approximately 97% of the total number of workers covered by state UI programs who were not federal workers, plus the total number of federal workers.

Beginning in 1997, NASI started refining its estimation by considering the various differences in UI and workers' compensation coverage rules in each state. Considering these differences produced an approximation similar to that used from 1993 to 1996, namely that in 2015 "workers' compensation coverage extended to an estimated 97.2 percent of jobs covered by unemployment insurance and 85.7 percent of all jobs held in the employed workforce." Readers should note that this method of calculation is impossible in Texas, the only state where workers' compensation coverage is voluntary and not required to be obtained by employers. Therefore, workers in Texas covered by UI cannot be used to estimate the number of workers potentially covered by workers' compensation. Coverage estimates for Texas are based on periodic surveys conducted by the Texas Department of Insurance and the Workers' Compensation Research and Evaluation Group. These groups estimated that approximately 81% of Texas employees were covered in 2015, excluding federal government workers in that state.

Deductible Policies

Deductible policies generally require workers' compensation insurers to pay 100% of all indemnity and medical benefits but contractually obligate the insured employer to reimburse the insurer for a portion of this amount. The deductible is the amount that the employer must reimburse. Deductible policies can be written based on a per claim or an aggregate basis, or a per claim basis with an aggregate monetary limit. Employers with deductible policies are essentially self-funding for the amount of the deductible and, consequently, pay lower workers' compensation premiums. Nonetheless, deductibles are considered an insurance expenditure because insurers are ultimately liable for all amounts, including any monies not reimbursed by employers. Accordingly, amounts reimbursed to insurers under deductible policies are included in the "private insurance" and "state fund" data.

Total Benefit Payments vs. Total Costs

Total indemnity and medical benefit payments in Table 16 should not be mistaken for the "total cost" of workers' compensation to employers. These "total benefit payments" are indemnity and medical care benefit payments made during the calendar year on all claims, including benefits paid for new injuries in the current calendar year and benefit payments in the current year on open claims for injuries that occurred in prior years. "Total costs" for those employers insured through private insurers and state funds are the premiums paid, plus any deductibles, surcharges, and assessments. Premiums reflect the actuarial value of all benefit payments and related costs and expenses for all injuries that occur while the policy is in effect. They include allocations for current benefit payments as well as reserves for future benefit payments, claims adjustment expenses, acquisition costs, taxes, assessments, licenses, fees and other operating costs, and a profit factor. "Total costs" for self-insured employers are estimated as benefits paid plus costs for claims administration, taxes, fees and assessments.

III. Analysis

Total benefit expenditures are one widely accepted measure of the total economic burden of social insurance programs in each year. The figures for state workers' compensation expenditures in this bulletin can be better understood by comparing them to the total number of covered workers and the total of covered payroll, or costs per $100 of covered payroll.

Cost Per $100 of Covered Payroll (Benefit Cost Rate)

The benefit cost rate is the cost per $100 of covered payroll. Table 1 ranks the states according to their benefit cost rate. Table 2 lists the benefit cost rate by state from 2006 to 2015. The national totals in this table are determined using the total amount of covered payroll and benefits for each year, while the state averages in this table are determined by adding all the state calculations for each year and then dividing this number by the total number of jurisdictions (fifty-one). Table 3 lists the percentage changes in the benefit cost rate for each state from 2006 to 2015. The national totals in this table are determined using the differences between the national figures from Table 2 over a given time period, while the state averages in this table are determined by adding all the percentage changes for a given time period and then dividing this number by the total number of jurisdictions (fifty-one).

National Average Benefit Cost Rate

Year	National Total	Annual Change in Amount	Annual % Change
2006	0.96	NA	NA
2007	0.93	-0.03	-3.1
2008	0.96	0.03	3.2
2009	1.01	0.05	5.2
2010	0.98	-0.03	-3.0
2011	0.99	0.01	1.0
2012	0.96	-0.03	-3.0
2013	0.94	-0.02	-2.1
2014	0.89	-0.05	-5.3
2015	0.83	-0.06	-6.7

The national benefit cost rate declined from 0.89 to 0.83 (-6.7%) from 2014 to 2015, and from 0.96 to 0.83 from 2006 to 2015 (-13.5%). The national 6.7% decrease from 2014 to 2015 continued decreases starting in 2012. In Washington state both employers and employees contribute to workers' compensation premiums. The data reported include only the employer portion.

Cost Per Covered Employee

Tables 4 to 13 display the number of covered workers, covered payroll, benefits paid, benefit costs per covered employee, and benefit cost rates from 2006 to 2015. The benefit cost per covered employee for each state is determined by dividing the amount of benefits by the number of covered workers. The national totals in these tables are determined by using the total amount of benefits, covered workers, and covered payroll for each year. The state averages are determined by adding all the state calculations for a given time period, and then dividing this number by the total number of jurisdictions (fifty-one). The benefit cost per covered employee for each state for 2015 is as follows:

$200 or Less	AR ($193)	IN ($196)	TX ($168)			
$201 - $299	AZ ($290)	DC ($220)	KS ($271)	MI ($269)	NV ($282)	SD ($266)
	TN ($259)	UT ($215)	VA ($269)			
$300 - $399	AL ($354)	CO ($344)	GA ($345)	KY ($381)	LA ($399)	MD ($395)
	MA ($334)	MN ($380)	MS ($322)	MO ($353)	NE ($330)	NH ($353)
	NC ($313)	OH ($372)	OR ($359)	RI ($352)		
$400 - $499	FL ($406)	HI ($493)	ID ($403)	IL ($421)	IA ($412)	ME ($402)
	NM ($405)	ND ($425)	SD ($482)	WI ($435)		
$500 - $599	CT ($552)	DE ($535)	MT ($586)	NJ ($595)	OK ($502)	PA ($533)
	VT ($509)					
Over $600	AK ($720)	CA ($752)	NY ($654)	WA ($789)	WV ($631)	WY ($648)

Table 14 lists the benefit cost per covered employee for each state, the national average benefit cost per covered employee, and the state average benefit cost per covered employee from 2006 to 2015. The national totals in this table are determined by dividing the total amount of benefits by the total number of covered workers for each year, while the state averages are determined by adding all the state calculations for a given year and then dividing this number by the total number of jurisdictions (fifty-one). Table 15 lists the percentage changes in the benefit cost per covered employee for each state from 2006 to 2015. The national totals in this table are determined using the differences between the national figures from Table 14 over a given time period, whereas state averages in this table are determined by adding all the percent changes for a given time period and then dividing this number by the total number of jurisdictions (fifty-one).

National Average Benefit Cost Per Covered Employee

Year	National Total	Annual Change in Amount	Annual % Change
2006	405	NA	NA
2007	411	6	1.6
2008	433	22	5.2
2009	452	19	4.6
2010	454	2	0.4
2011	469	15	3.2
2012	467	-2	-0.3
2013	464	-3	-0.8
2014	454	-10	-2.1
2015	438	-16	-3.6

The national benefit cost per covered employee decreased by 3.6% from 2014 to 2015, but increased by 8.2% from 2006 to 2015. The benefit cost per covered employee decreased in most states and the District of Columbia from 2014 to 2015, with the largest decreases occurring in Delaware (-10.6%), Florida (-8.4%), Illinois (-13.0%), Maine (-8.6%), and Oregon (-7.0%). The largest increases occurred in Hawaii (8.0%), Kentucky (3.7%), New Hampshire (3.1%), South Dakota (7.9%), and Utah (3.8%).

Total Indemnity and Medical Benefit Payments

Table 16 details total benefit payments (indemnity and medical) from 2006 to 2015. The state averages in this table are determined by dividing the national totals by the total number of jurisdictions (fifty-one). Table 17 displays the percentage change by state from 2006 to 2015. The national totals in this table are determined by using the differences in national figures from Table 16, while the state averages in this table are determined by adding all the percentage changes for a given time period, and then dividing this number by the total number of jurisdictions (fifty-one).

Annual Workers' Compensation Indemnity and Medical Benefit Payments

Year	National Total ($000)	Annual Change in Amount ($000)	Annual % Change
2006	51,626,040	NA	NA
2007	53,044,751	1,418,711	2.7
2008	55,326,554	2,281,803	4.3
2009	55,209,460	-117,094	-0.2
2010	55,266,619	57,159	0.1
2011	57,656,037	2,389,418	4.3
2012	58,481,901	831,864	1.4
2013	59,047,753	565,852	1.0
2014	58,970,688	-77,065	-0.1
2015	58,150,694	-819,994	-1.4

Total benefit payments decreased by $820.0 million (-1.4%) from 2014 to 2015, but increased by $6.5 billion (12.6%) from 2006 to 2015. Total benefit payments decreased in most states from 2014 to 2015, with the largest decreases occurring in Delaware (-8.5%), Illinois (-11.7%), Maine (-7.8%), North Dakota (-6.2%), and Ohio (-5.4%). The largest increases occurred in Colorado (5.9%), Hawaii (10.2%), Kentucky (5.4%), South Dakota (9.2%), and Utah (7.7%).

Private Insurance Benefit Payments

Table 18 details private insurance benefit payments (indemnity and medical) from 2006 to 2015. The state averages in this table are determined by dividing the national totals by the total number of jurisdictions (fifty-one for every year from 2006 to 2015, except for fifty in 2006 and 2009.) Table 19 displays the percentage change by state from 2006 to 2015. The national totals in this table are determined by using the differences in national figures from Table 18, while the state averages in this table are determined by adding all the percentage changes for a given time period and then dividing this number by the total number of jurisdictions.

Annual Private Insurance Indemnity and Medical Benefit Payments

Year	National Total ($000)	Annual Change In Amount ($000)	Annual % Change
2006	27,946,464	NA	NA
2007	29,410,376	1,463,912	5.2
2008	30,795,628	1,385,252	4.7
2009	31,061,310	265,682	0.9
2010	31,160,818	99,508	0.3
2011	32,235,674	1,074,856	3.4
2012	33,429,362	1,193,688	3.7
2013	35,316,150	1,886,788	5.6
2014	34,350,298	-965,852	-2.7
2015	33,991,257	-359,038	-1.0

Total private insurance benefit payments decreased by $359.0 million (-1.0%) from 2014 to 2015, but increased by $6.0 billion (21.6%) from 2006 to 2015. Total private benefit payments decreased in most states from 2014 to 2015, with the largest decreases occurring in Arkansas (-10.1%), Delaware (-11.6%), Illinois (-12.6%), Maine (-9.1%), Oregon (-9.9%). The largest increases occurred in Colorado (11.8%), Hawaii (6.2%), Michigan (6.8%), New Mexico (26.4%), and South Dakota (9.1%).

Nevada eliminated its exclusive state fund in 1999, West Virginia did so as of January 1, 2008, based on legislation enacted in 2005. Arizona completely eliminated its state fund in 2012. Employers who previously were insured by the state fund subsequently obtained coverage from private insurers (including the successor to the state fund) or became self-insured.

NOTE: The small amounts of private insurance benefit payments in states with exclusive state funds are attributable to employers who are under the federal Longshore program; those who have multistate riders on their insurance policies covering these states; and the fact that some excess workers' compensation coverage for self-insurance is included in reports to A.M. Best. The states with exclusive state funds and changes in their benefit payments from 2014 to 2015, are North Dakota (526.5%), Ohio (41.3%), Washington (-40.8%), and Wyoming (43.3%).

Self-Insurance Benefit Payments

Table 20 details self-insurance benefit payments (indemnity and medical) from 2006 to 2015. The state averages in this table are determined by dividing the national totals by the total number of jurisdictions (forty-nine). Table 21 displays the percentage change by state from 2006 to 2015. The national totals in this table are determined by using the differences in national figures from Table 20, while the state averages in this table are determined by adding all the percentage changes for a given time period and then dividing this number by the total number of jurisdictions.

Annual Self-Insurance Indemnity and Medical Benefit Payments

Year	National Total ($000)	Annual Change In Amount ($000)	Annual % Change
2006	13,124,561	NA	NA
2007	13,481,643	357,082	2.7
2008	13,855,391	373,748	2.8
2009	13,950,319	94,928	0.7
2010	13,556,795	-393,524	-2.8
2011	14,414,610	857,815	6.3
2012	14,764,734	350,124	2.4
2013	14,961,170	196,436	1.3
2014	15,051,609	90,439	0.6
2015	15,138,592	86,983	0.6

Self-insurance includes individual self-insurance and group self-insurance. Total self-insurance benefit payments increased by $90.4 million (0.6%) from 2014 to 2015, and also by $2.0 billion (15.3%) from 2006 to 2015. Total self-insurance benefit payments decreased in most states from 2014 to 2015, with the largest decreases occurring in Georgia (-9.1%), Illinois (-10.4%), Louisiana (-9.7%), Nevada (-9.6%), and Oregon (-14.3%). The largest increases occurred in Alaska (35.7%), Arkansas (36.1%), the District of Columbia (114.0%), Hawaii (13.6%), and Wisconsin (34.8%). North Dakota and Wyoming do not permit self-insurance.

State Fund Benefit Payments

Table 22 details state fund benefit payments (indemnity and medical) from 2006 to 2015. Table 23 displays the percentage change by state from 2006 to 2015. The national totals in this table are determined by using the differences in national figures from Table 22, while the state averages in this table are determined by adding all the percentage changes for a given time period and then dividing this number by the total number of jurisdictions (twenty-six for 2006, twenty-four from 2007 to 2012, and twenty-three for 2013 to 2015).

State Fund Indemnity and Medical Benefit Payments

Year	National Total ($000)	Annual Change In Amount ($000)	Annual % Change
2006	10,555,015	NA	NA
2007	10,152,732	-402,283	-3.8
2008	10,275,618	122,886	1.2
2009	9,936,123	-339,495	-3.3
2010	9,778,821	-157,302	-1.6
2011	9,783,027	4,206	0.0
2012	9,886,742	103,715	1.1
2013	9,606,106	-280,636	-2.8
2014	9,223,624	-382,482	-4.0
2015	9,020,846	-202,778	-2.2

Total state fund benefit payments decreased by $202.8 million (-2.2%) from 2014 to 2015, and also by $1.5 billion (-14.5%) from 2006 to 2015. Total state fund benefit payments increased in most states from 2014 to 2015, with the largest increases occurring in Hawaii (16.8%), Kentucky (10.9%), Louisiana (9.7%), Maryland (8.8%), and Oklahoma (15.1%). The largest decreases occurred in California (-17.5%), North Dakota (-6.2%), Ohio (-6.1%), South Carolina (-6.7%), and Texas (-5.6%).

Twenty-three states had state funds in 2015. Ohio, North Dakota, Washington, and Wyoming have exclusive state funds, meaning that employers can buy workers' compensation insurance only from these funds and not from private insurers. The Hawaii, Kentucky, Louisiana, Maine, New Mexico, Rhode Island and Texas state funds have been organized as employer mutual insurance companies. (Readers should note that this report uses the NASI methodology for determining how to categorize state funds.)

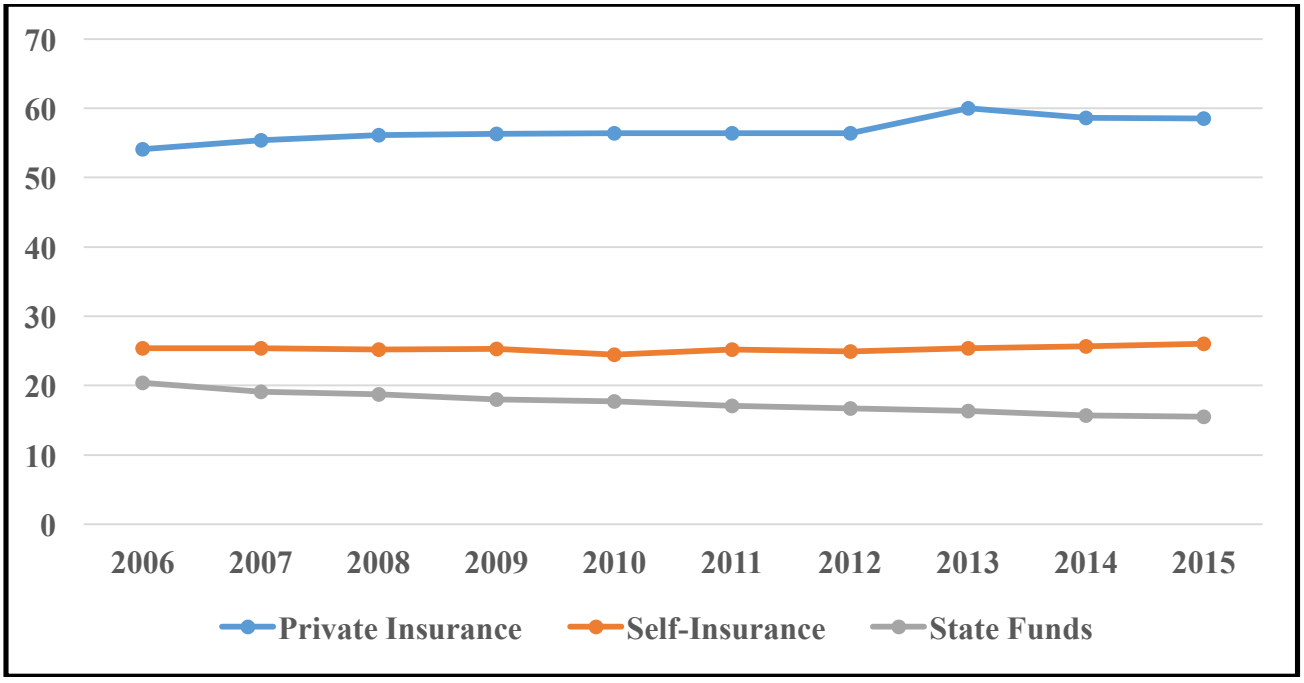
In 2005, West Virginia enacted legislation to privatize its insurance market. Pursuant to this legislation, on January 1, 2006, the state abolished its Workers' Compensation Commission and replaced it with a new private mutual insurance company called BrickStreet Mutual Insurance Company. On July 1, 2008, West Virginia opened its insurance market to private carriers. BrickStreet was still the only source of workers' compensation coverage for all state agencies, boards, commissions and institutions of higher education through 2012, after which they could purchase coverage from any insurance carrier licensed to conduct business in the state. Please note that although the West Virginia state fund was no longer selling policies in 2009, it was still paying benefits for policies sold in previous years.

Please also note that the South Carolina state fund insures only public entities and not private businesses. State agencies insure through the state fund, a decision which is optional for city and county agencies. The decision to include the South Carolina state fund as a state fund was based on its denomination as such by the American Association of State Compensation Insurance Funds (AASCIF).

Percent of Total Benefit Payments by Payer

Table 24 details the percentage of total benefit payments made by private insurance carriers, self-insurers and state funds in 2015. Tables 25-27 detail this information from 2006 to 2015. The state averages in these tables are determined by adding all the benefits or percentage changes for a given time period, and then dividing this number by the total number of reporting jurisdictions per category. The national totals are determined by dividing the total amount of benefits per category by the total amount of benefit payments for a given time period. The national percentages paid by each payer from 2006 to 2015 are noted in the following graph:

PERCENT DISTRIBUTION BY PAYER



The most obvious conclusion from the graph is that the national percentage of total benefit payments made by private and self-insurers remained relatively constant from 2006 to 2015 despite the recession. The national percentage of private insurance benefit payments increased from 54.1% to 58.5% (8.1%) during this period. Self-insurance benefit payments increased slightly from 25.4% to 26.0% (2.4%). State fund benefit payments decreased from 20.4% to 15.5% (-24.0%). The decline in state fund benefit payments may be somewhat attributable to the fact that as already noted, Nevada and West Virginia have eliminated their exclusive state funds. Arizona also completely eliminated its state fund.

Medical Benefit Payments

Tables 28-37 detail medical and indemnity benefit payments, and the percentage of medical and indemnity benefits for each state from 2006 to 2015. The state averages in these tables are determined by adding all the percentage changes for a given year and then dividing this number by the total number of jurisdictions (fifty-one).

Medical Benefits

Year	National Total ($000)	Annual Change in Amount ($000)	Annual % Change
2006	25,348,586	NA	NA
2007	26,194,865	846,279	3.3
2008	28,031,086	1,836,221	7.0
2009	27,561,346	-469,740	-1.7
2010	28,184,947	623,601	2.3
2011	29,698,063	1,513,116	5.4
2012	29,962,545	264,482	0.9
2013	30,613,986	651,441	2.2
2014	30,631,089	17,103	0.1
2015	29,902,133	-728,956	-2.4

Tables 38-41 indicate indemnity and medical payment benefits and the percentage change for each state from 2006 to 2015. The national totals in tables 39 and 41 are determined by using the differences in national figures from Tables 38 and 40 respectively, while the state averages are determined by adding all the percentage changes for a given time period and then dividing this number by the total number of jurisdictions (fifty-one). Total medical benefit payments decreased by $729.0 million (-2.4%) from 2014 to 2015, but increased by $4.6 billion (18.0%) from 2006 to 2015. Total medical benefit payments decreased in most states from 2014 to 2015, with the largest decreases occurring in Delaware (-7.7%), Indiana (-7.9%), North Dakota (-10.8%), Rhode Island (-15.3%), and Wyoming (-8.5%). The largest increases occurred in the District of Columbia (7.8%), Hawaii (9.9%), Michigan (5.8%), Montana (5.8%), New Mexico (6.8%), and South Dakota (7.5%).

Data Sources. Source data are collected by the National Academy of Social Insurance (NASI). NASI derives its estimates of benefits paid and employer costs from a survey questionnaire it sends to the states and A.M. Best, a private company that specializes in collecting insurance data and rating insurance companies. Additional data sources NASI uses include reports from various state and federal agencies, and the National Council on Compensation Insurance (NCCI), which is the principal data collection organization for the workers' compensation insurance industry.
